

# 2020-2021

## PERSONALIZED LEARNING MODEL

### A WORLD IN FLUX

While many are predicting that education will change completely after COVID-19, we know that, at the core, your student will still need a strong community, deeper relationships, friends who encourage them, and mentors who have the same values as your family. Wayfinder knows that in order to provide that school environment regardless of what happens this fall, we will need to have innovative solutions for this next school year to ensure students will receive the education they deserve.

### QUESTIONS YOU MAY BE ASKING

? Can you guarantee continuity of top-notch service all year long during the 2020-2021 school year? **YES!**

? Are you making adjustments for students who are behind or advanced as a result of stay-at-home orders? **YES!**

? Will you be able to justify us paying tuition if our student cannot be on campus? **YES!**

**That's because our program is already designed to be adaptable, our teachers are trained to provide innovative education, and our classes revolve around deeper learning opportunities, not sitting in a classroom.**

### 2020-2021 PROGRAM TARGET OBJECTIVES

- 1** Provide a high-quality, experiential educational program that can be utilized without interruption, regardless of what's going on in the world.
- 2** Integrate Christian values, hands-on learning, and Wayfinder core values into a flexible, customized blended learning model while maintaining strong connections between staff, students, and families.
- 3** Take monitoring, tutoring, and instructional responsibility off parents' plates if stay-at-home orders are reinstated throughout the school year.

### WAYFINDER CHRISTIAN ACADEMY HAS A PLAN FOR THE 2020-2021 SCHOOL YEAR

Innovation and adaptability are core to Wayfinder Christian Academy's overall philosophy, so Wayfinder has been able to address concerns for next school year while still aligning instruction with our founding learning objectives and philosophy. The 2020-2021 Wayfinder Personalized Learning Model integrates several educational techniques to provide the most adaptable and student-centered learning environment possible. It offers a flexible, personalized, Christian-values-based curriculum that blends self-paced study with hands-on, project-based classroom experiences. Students work collaboratively with peers and staff on guided and independent projects in Campus Learning Labs. Additionally, students get real-world learning opportunities within the community, with a variety of industry specialists, through on-site experiences and outdoor education trips. Credentialed teachers are there through the whole process to facilitate learning, discussions, and time for reflection. Mentors help students find a customized pathway that meets their overall academic and personal goals. Integrated throughout all the experiences is a strong focus on community, servant leadership, and faith-based personal development.
